

The world's most trusted
solutions for safe, efficient
and compliant air and
ground operations.

Our spheres of excellence in Aviation solutions

Health & Medical Emergency Services

Designed for aeromedical operators seeking an all encompassing solution for flight and medical crews.

Air Transport Operations

Supporting air transport operators in charter, tourism and airline segments around the globe.

Agricultural & Resource Management

Assisting aerial agricultural operators to conduct safe and efficient operations.

Cargo & Aerial Work

Streamlining operations for cargo and aerial operators to maximize efficiencies.

RPAS/Drones

Managing Part 101 and SMS requirements for operators of Remotely Piloted Aircraft Systems (RPAS) in controlled airspace.

Public Safety

Empowering police, air ambulance/medical retrieval and aerial firefighting operators.

\ Experience the Vellox Group advantage

Vellox Group empowers operators to perform safely, efficiently - no matter the challenge.

Our industry-leading platform provides the most comprehensive suite of solutions, equipping decision-makers with the insights, innovation, and agility needed to adapt to evolving market demands and maintain excellence at every stage of operations.

Leading air—and increasingly ground—operators trust Vellox Group to ensure efficiency, compliance, safety, and operational excellence.

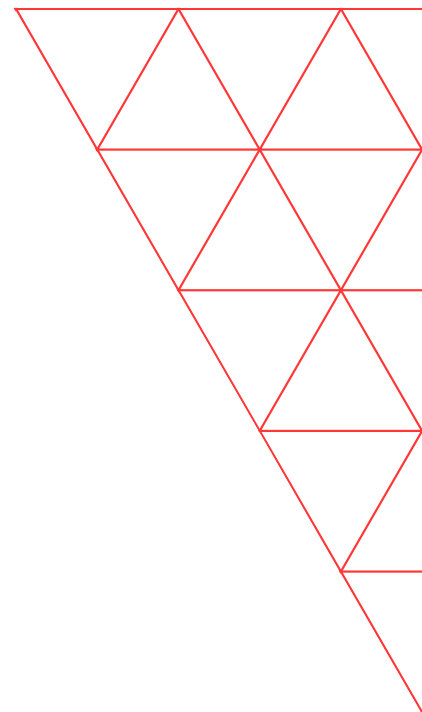

Powered by a global team of industry experts and cutting-edge AI, Vellox Group's integrated operations, fleet, dispatch, maintenance and safety systems provide unmatched effectiveness and control.

Unlike most industry players who are owned by Private Equity firms, Vellox Group has permanent ownership, ensuring sustained innovation and a deep focus on customers.

"The software captures the essence of our operations, with the ability to track and report on a wide range of data.

The team are always so helpful, and of course knowledgeable in every aspect."

Carol Hill, LifeFlight

Empowering Your Business with Cutting-Edge Solutions

Solutions that enhance efficiency, safety, and operational control

Vellox Group delivers the most comprehensive suite of dispatch, fleet management, operational, maintenance and safety solutions—seamlessly integrated into a single platform for unmatched visibility and control across your organization.

With powerful planning, execution, and decision-support tools, our platform empowers operators to optimize efficiency, enhance safety, and make smarter, data-driven decisions in real time.

Optimize Every Aspect of Flight and Ground Management

Maximize efficiency across flight and ground operations with our end-to-end solution. From crew scheduling and OCC Command Center management to real-time fleet tracking, our integrated platform centralizes key functions into a single, intuitive interface. Automated workflows reduce administrative tasks, minimize errors, and ensure regulatory compliance. Gain actionable insights through powerful analytics and real-time reporting—empowering smarter, data-driven decisions and driving operational excellence.

End-to-end Safety Management System

Used by leading providers in aviation, transport, health sectors and more, our cloud-based, customizable solution fully integrates SMS requirements into one centralized system.

Our platform proactively addresses the four pillars of safety, decompresses the complexity of safety systems/processes and empowers employees in the working environment.

Fleet Management With A Focus On Safety

Our patented software and hardware technology helps thousands of aircraft owners and operators get their teams home safely every day.

Our platform provides seamless, end-to-end fleet management—from planning and day-of operations to mid-flight tracking—enhancing safety, optimizing efficiency, and enabling real-time decision-making.

Seamless Dispatch for Every Mission

Tailored for both emergent and non-emergent services, our powerful real-time dispatch solution equips first responders, caseworkers, and medical operations teams with the tools to seamlessly coordinate ground and airborne assets with precision.

Operations

Discover comprehensive operational features tailored to enhance aviation management.

Take control of your operations and drive efficiency with our all-in-one aviation management platform. Streamline workflows with real-time flight oversight, intelligent crew scheduling, duty logging, and mobile-friendly manifest and risk form submissions—empowering your team to work smarter, not harder.

\ Safety

Elevate Safety Standards with Our Integrated SMS Solution

Strengthen your organization's safety culture and achieve full compliance with industry standards through our comprehensive Safety Management System (SMS) solution. Our integrated modules streamline safety processes, empower proactive risk management, and ensure regulatory adherence. With real-time incident reporting, centralized hazard registers, automated audits, and insightful safety analytics, you gain the tools needed to foster a safety-first mindset across every level of your operation.

Audit Management

Hazard/Risk Management

Incident/Accident Reporting

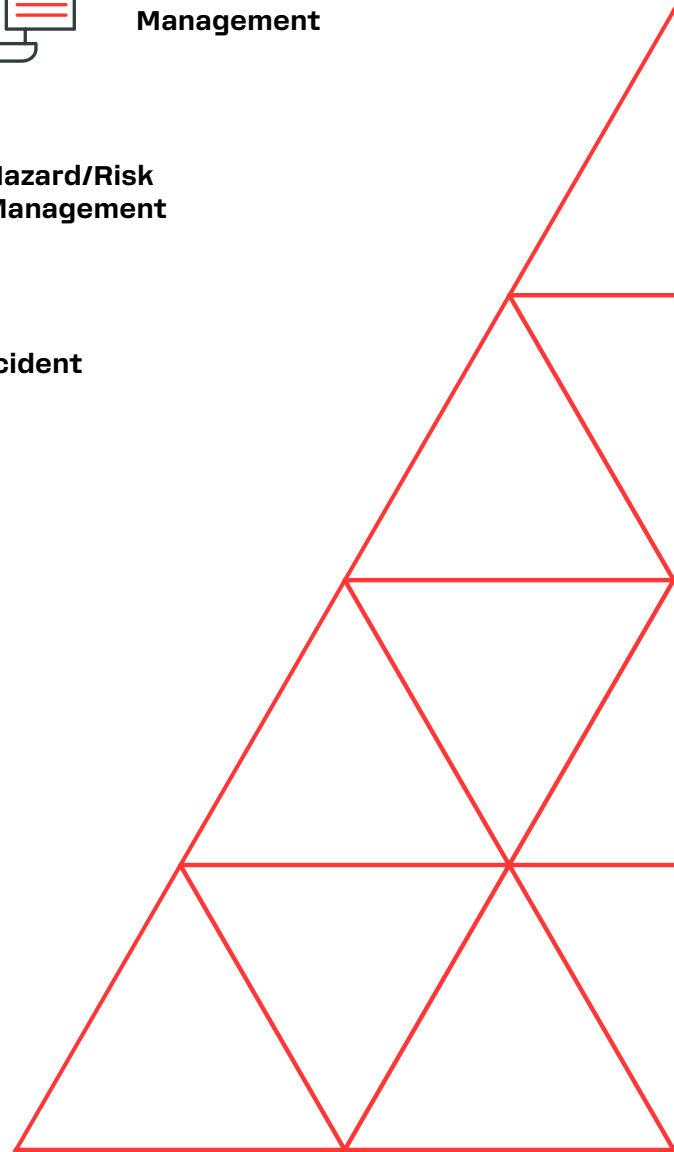

Safety Statistics & Dashboards

Operational Risk Assessment / FRAT

Change Management

\ Fleet Management

We're with you for the entire journey

Our Fleet Management software has been designed with aviators in mind, enabling you and your team to build a safer, smarter operation.

Equip your team with the right tools:

Real-Time Fleet Tracking

Flight Data Sharing

Safety Insights

Digital Flight Logs

3D Flight Replay

Programmatic Response

Spidertxt

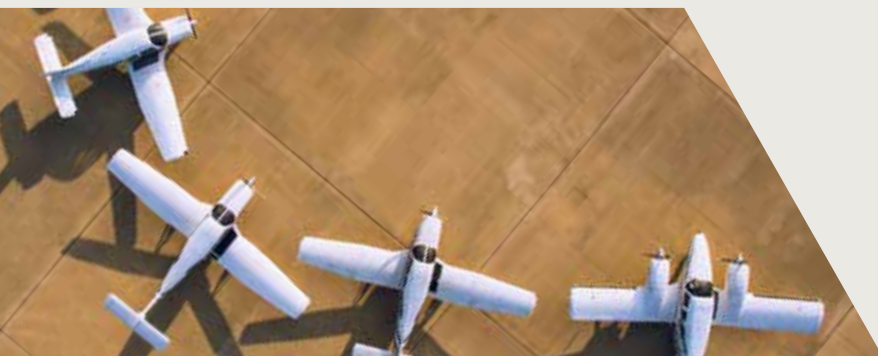

Historical Reports

Real-Time Weather Overlays

Spider X Hardware

\ Dispatch

Cross-sector CAD solutions for evolving business needs

In an era where sectors are increasingly interlinked, our solutions are designed to transcend traditional business boundaries. We understand the nuances and demands of each sector and offer customized tools and strategies accordingly. Our Real-Time Optimization and Auto Assignment technology is designed to propel your business into a new era of productivity.

Resource Allocation

Scheduling

Unified Communication

Transport

Digitized Incident Plans

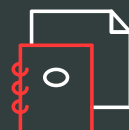

Maps

Crew Check-Ins

Data Integration & Reporting

Regulatory Compliance

Maintenance

Gain complete visibility and control across every asset—airborne or grounded—with a modular maintenance ERP designed for modern aviation.

Trusted by airlines, MROs, CAMO providers, OEMs, and government operators, Vellox Maintenance Hub unifies planning, parts, and compliance in one integrated ecosystem—enhancing oversight, reducing downtime, and safeguarding airworthiness at scale.

Work Order Management

Parts & Inventory Control

Digital Task Cards

Compliance Tracking

Real-Time Dashboards
