

# You Save Lives. We'll Handle the Manual Work.

Carenostics enables transplant centers with **AI-powered automation** to move more patients to transplant faster and reduce coordination burden

**Best Use of AI  
in Health Tech  
Winner**

**hlth.**

## Streamlining Patient Coordination

**Surface information** and **automate manual tasks** across the end-to-end transplant journey

**50-70% less time** per patient on administrative tasks (e.g., automatic alerts for new relevant test results)

**Automatically generate patient reports** with the latest information on demand, saving time throughout the transplant journey

## How: Next Generation Product Features

### HIE & External Source Access

Retrieves patient data (e.g., labs) from external EHRs

### GenAI Extraction

AI automatically extracts relevant insights from scanned PDFs & notes

### Real-Time Task & Data Alerts

Takes the guesswork out of which patients to prioritize

### Automatic Patient Reports

On-demand patient reports generated in one click

### Dynamic Transplant Worklist

Sortable, filterable, and actionable worklist for tracking

### Full EHR Integration

Real-time two-way EHR integration (with nurse validation)

## Forecasted Impact: Growth Without Needing to Hire

Grow transplant-ready active waitlist

Increase transplant volume

Increase efficiency & decrease days to listing

Improve nurse satisfaction & retention

## Modules: Supporting the End-to-End Journey

Referral-to-Evaluation (Triage)

Evaluation-to-Waitlist Coordination

Active Waitlist Management

Post Tx-Management
